ABSTRACT:

According to a broad aspect of a preferred embodiment of the invention, a Customer Interface Process is provided. First, a service level agreement is received for a hybrid network customer. Next, the service level agreement is stored after which inquiries are received from network customers reflecting occurrences related to the hybrid network. Thereafter, events are generated based on the customer inquiries and the service level agreement.

ART-UNIT: 273

PRIMARY-EXAMINER: Chin; Wellington

ASSISTANT-EXAMINER: Carman; Melissa Kay

ABSTRACT:

Telephone calls, data and other multimedia information including video, audio and data is routed through a switched network which includes transfer of information across the internet. Users can transmit video, audio and data communications of designated quality over the internet to other registered video telephony users. Users can manage more aspects of a network than previously possible, and control network activities from a central site.
